GET AN AIROHEAT FOR JUST \$1,868

Inline Plumbing & Electrical - Leaders In 24/7 Service
P: 1800 633 920 | E: admin@inlineplumbing.com.au
W: www.inlineplumbing.com.au

Ask Inline Plumbing & Electrical to supply & install an Airoheat hot water system and it could cost you only \$1,868 after Government Rebates

Total Airoheat cost incl installation*	\$3,668
Total Rebate available	\$1,800
You pay after rebates	\$1,868!

Why Airoheat?

Airoheat is just like having a Solar Hot Water system, but without Solar Collectors on your roof. Airoheat extracts the heat energy from the air surrounding it, using this to heat the stored water. This results in 60 – 70% less energy consumption than compared with a traditional Electric Water Heater.

Airoheat is Australia's MOST AWARDED Heat Pump

What rebates are available on Airoheat?

There are 3 rebates in total which are available in NSW

1. **Renewable Energy Certificates – RECs** (Airoheat - \$900 at 22/2/2010 – 30 RECs)
(rebate payable within 14 days)#
2. **Federal Government \$600 Rebate** – Passed through the Senate 21/2/2010 (rebate payable within 8 weeks)
3. **NSW Government Rebate** – rebate extended until 30th June 2011!!! (rebate payable within 60 days)

What are the requirements for receiving all 3 Rebates when purchasing Airoheat?

1. Must be replacing an Electric Storage Heater (which has been installed for more than 12 months)
2. Must be installed by a licensed plumber
3. Must be installed in a principle place of residence and you must not be applying for the Government's 'Insulating Australian Households Rebate' (\$1600 rebate condition only).

A quick note to thank you "Inline Plumbing & Electrical", for the wonderful service we received from your company today.

Not only was the price great, the service from both admin and the installer was exceptional. From the time we booked the installation over the phone to actual installation of our water heater and removal of waste, was less than an hour and a half - AMAZING. Very rarely has this type of service ever be offered and actually delivered.

I will definitely be recommending your company to anyone in need of Hot Water Heaters etc... Customer service is sadly - a dying act, but we can happily say that your company has completely blown us "out of the water" with the exceptional service we received today.

Thank you once again, our family thanks you for the hot showers we may have, once again.

Kind regards, *Tina Gibson-Jones, Colyton NSW*

*This sell price is effective from 22 Feb 2010 and may change without notice. Where the existing Electric Storage tank is already outside & already on Continuous Heating.
#The value of RECs is subject to change due to market fluctuations. Value of RECs should be confirmed on day of installation.
